Tools: one Logifaces Set / class | 110 - Twenty Questions Sketch

⬙ 🧩 Ⓛ

MATHS / GAME | |

DESCRIPTION

The teacher chooses a Logifaces piece and shows it to one student only. The other students can guess according to the rules of the game "twenty questions" (Hungarian name of this game is "barchoba"): they ask yes/no questions from the student who is hiding the block. The students draw the piece when they have enough information from the answers to do so. The teacher checks the drawings.

When all / most of the students have a correct drawing, they can see the piece.
