DESCRIPTION

- LEVEL 1** Students choose a Logifaces block and consider the planes of symmetry of it, they discuss the results with their partner or with the whole class.
The students should try to specify the plane of symmetry by a few points of the plane that can be described using the parts of the block.
- LEVEL 2** The teacher asks the students to choose a block with a given number of planes of symmetry. The students discuss their choice with their partner or with the whole class.
- LEVEL 3** Students classify the blocks by the number of planes of symmetry. They discuss the connection between the code of the block and the number of planes of symmetry.
