

## Homework

- How often is the sun directly overhead (at zenith) for a given latitude on Earth?
- Can you predict *when* this happens? (Hint: use GeoGebra to plot a graph of latitude against solar zenith dates - remember the formula connecting the tilt of the Earth to the time of year)

9

You are a ghost driving a meat  
covered skeleton  
made from stardust  
riding a rock  
flying through space.

Fear nothing
