

Appendix 1. What Happens If It is Recycled?

In a year, when 1 ton of used paper is not thrown away, but recovered and reused in paper production;

	<p>It ensures the disposal of 12,400 m³ of carbon dioxide, a greenhouse gas in the air.</p>
<p>It ensures the continuation 12,400 m³ of oxygen production .</p>	
	<p>It provides the protection of 17 mature trees, which provide the oxygen needs of 34 people.</p>
<p>It saves 32 m³ of water consumed by 3 families in 1 month .</p>	
	<p>It saves 2.4 m³ from landfills.</p>
<p>It saves 1,750 liters of fuel-oil that 2 families will consume for heating in winter.</p>	
	<p>It saves 4,100 KW/h of electricity that 20 families will consume in 1 month.</p>
